Short information about the 9th and final project meeting

[11.05 - 15.05.2014] in Carbonia, Italy
Carbonia is situated in the South-West Sardinia – an island in the middle of the Mediterranean Sea. It is 65 Km far from Cagliari, the administrative seat of Sardinia.
• **Carbonia** Carbonia was founded in 1937 and inaugurated on 18th December 1938 in an area – Sulcis – rich of important coal seams. Indeed the town was named just after coal. It literally means coal town.

• Thanks to its climatic and geological features and its landscape, Carbonia is an absolutely particular place, a mix of different physical environment.

  From its highest points, it is possible to admire wide hills and plains; in the distance, the coastline and the sea and also the islands of San Pietro and Sant’Antioco.

• Its geographical barycentric position offers the chance to visit the entire Sulcis region throughout the year: beautiful beaches, mountains, grottos, trekking paths and, in general, everything linked to nature.

• The climate is tipically Mediterranean. Temperature is about 20-25°C in May.
