WELCOME TO
I.I.S. "C. BECCARIA"
Beccaria is a Technical Commercial School based in the centre of Carbonia, in the south-West of Sardinia.

We also have two Agricultural Schools, one in Santadi approximately 31 km from Carbonia and another in Villamassargia, approximately 15 km from Carbonia.
✓ 620 students

✓ 22 classrooms (all equipped with LIM).
✓ Sporting facilities

✓ Laboratories
Among the technologies available to staff and students are:

- Business administration classroom
- A text and data processing lab
- A science lab
- A Language lab
The school also has

- Weight room
- Gym
- Court for basketball and volleyball
- Library
Our main objective is to ensure that our students receive the best education possible to prepare them for further education and the world of work. Some of our ss are “special needs ss” and we take particular care of them.
The following are some of the activities we undertake to address the socio-cultural difficulties that some of our students have to face:

- Extra support for pupils with learning difficulties
- Work experience opportunities
Cultural activities in the fields of:
• Music
• Theatre
• Arts
• Sports
• Subject-cultural themed school trips
• Cultural exchanges.

Some ss have got first prize in a National competition related to environmental and socio-cultural issues and were praised by the President of Italy.
Our school is committed to carry out the task of forming technicians in the business, economic and tourism fields.

As far as the vocational schools of Santadi and Villamassargia are concerned, we teach the knowledge and skills required by the agricultural and associated industries.
Students who graduate in “Administration, Finance and Marketing” have general competences in the field of national and international economics, civil and tax legislation, business processes, marketing skills, knowledge of insurance/financial products.

Students should be able to:
• Utilize methods, tools, accounting and non-accounting techniques in line with national and international economic principles:

• Fill in company financial and administrative documents;

• Cooperate in negotiations related to the different function areas of the company;

• Use technology and different software for the integrated management of administration, finance and marketing.
The diploma in BUSINESS INFORMATION SYSTEMS allows students to gain in-depth IT skills along with those covered on the Accounting, Finance and Marketing course. These skills concern the knowledge and use of software packages for business management and programming tools for web sites.
Students study micro/macro economics, tax legislation in the field of tourism enterprises, as well as specific issues concerning the sector.

Particular attention is paid to the use and enjoyment of the landscape, heritage, arts, culture, crafts and food and wine.

They develop the management skills to work in the tourism field as well as developing the required language and IT skills.
This five year course aims to provide well prepared young people who have knowledge of development, production and marketing of agro-based products to the agricultural industry. After three years students can choose to specialize in farming or in agro-food processing.
This course is aimed at people who interrupted their High School Education and adult immigrants who wants to get a high School Diploma in Italy.
THANK YOU
